

**PANOLA COUNTY GROUNDWATER CONSERVATION DISTRICT  
NOTICE OF PUBLIC COMMENT PERIOD ON  
GMA-11 DESIRED FUTURE CONDITIONS**

Groundwater Management Area 11 (GMA 11) has proposed the following desired future conditions (DFCs) for the relevant aquifers in the Panola County Groundwater Conservation District (PGCD) in Panola through 2080 expressed as average drawdown: Carrizo Wilcox Aquifer: 21 feet. The Texas Water Development Board (TWDB) designated GMA 11 to include: Neches & Trinity Valleys GCD, Panola County GCD, Pineywoods GCD, and Rusk County GCD. Information on the DFCs: [www.pcgcd.org/groundwater-management-area-11](http://www.pcgcd.org/groundwater-management-area-11).

The PGCD is currently receiving public comments on the proposed DFCs under §36.108, Texas Water Code, until July 31, 2026. Written comments may be submitted to PGCD at 419 W. Sabine Street, Carthage, TX 75633 or [district@pcgcd.org](mailto:district@pcgcd.org). The PGCD will hold a public hearing on the proposed DFCs on June 23, 2026, at 5:30 p.m. at the District office, located at 419 W. Sabine Street, Carthage, TX 75633. Please contact the District's General Manager, Teresa Griffin, with questions at 903.690.0143; [district@pcgcd.org](mailto:district@pcgcd.org).

**GMA 11 Proposed Desired Future Conditions**

**April 28, 2026**

Groundwater Management Area 11 proposes the initial desired future conditions (DFCs) listed below on April 28, 2026. The DFCs are based on Scenario 26.1 for all counties, except for Anderson, Cherokee, and Henderson counties, which reflect DFCs from Scenario 33\*.

The GMA 11 consultant has been directed to prepare 5 additional simulations of the Groundwater Availability Model (GAM) to develop alternative scenarios to address the Neches & Trinity Valleys Groundwater Conservation District's concerns, as well as concerns about protecting existing wells and surface water interactions, which can be accomplished during the joint planning process under Section 36.108 of the Texas Water Code. The proposed DFCs for other GMA 11 counties will likely be affected. The additional simulations will be available by July 1, 2026, during the public comment period on the proposed DFCs. After this time, a deadline will be set for additional public comments prior to the adoption of the final DFCs by January 5, 2027.

As noted, the desired future conditions are expressed as average drawdown for each county-aquifer unit from 2013 to 2080.
